Deeper reflection...

What do your thinking preferences say about you....

- People you get on easily with... not so easily?
- Things that irritate...things you can flow with?
- How you might exclude or irritate others without realising?

- Way you tend to communicate... habits?
- How you have conversations and what you tend to focus on?

- What does this mean for how you see the world of work.. the things you value.. blind spots... what you look for?

- What does this all mean for how you collaborate... AND the collaboration you cause?

- What are your strengths to value and enjoy?

Stay in your groups of 4

And move to a table together ... there will be 2 groups per table

This is your “home” for much of the day. !

UNDER PRESSURE

When you are under pressure .. **Stressed** ... how do you show up

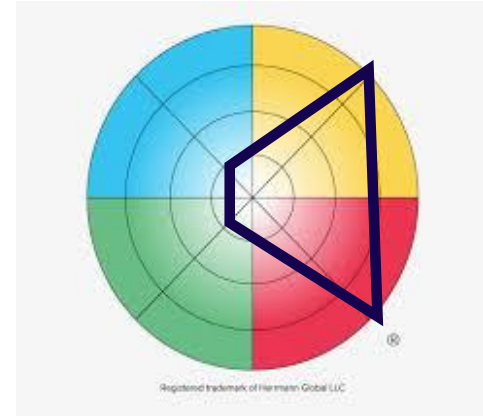

- Again .. Out of 10 what is your “default” thinking ?
- Use a different color create a new shape?

- What does say about how you are showing up?
- What would people around you be seeing under different circumstances ?

What does this profile suggest ?

Consider - Given your thinking preferences;

- What information will you be likely seeking ?
- What might you overlook ?
- How will you translate this information for you colleagues ... what might you need to pay attention to for a “whole brain” story?
- What will you enjoy? What is likely to irritate you?

If you have a question Make a note and at the end of the session put it in the HRT APP..

HEALTH ROUNDTABLE

Morning tea – back at 10.30am please

In your group of 4 - maximum diversity in thinking styles

Share what you heard ..

Be curious, listen for differences .. Work together to create a whole picture
