

# HRT1504 Paediatrics Meeting

## Key Ideas (Speaker session)

Criteria for Day surgery tonsil necessary for success

OSA biggest reason for Tonsillectomy – care with documentation

Tonsils in the morning

Pain relief protocols 1 hr prior load 40mg/kg of paracetamol. Analgesia is important post op. (x4)

Design service for 'normal' not 'exception'

Criteria led discharge for common condition

Right DRG for proper funding. Right age group for DSU. Not give higher dose of morphine to prevent inpatient stay.

Criteria for day surgery tonsil necessary for success

Standardised process "if surgeon can find common ground physicians should be able to".

Protocol, policies standardised.

Evidence based standardised protocol for anesthesia and surgery (technique).

Very important evidence – peer review to bring everything in line.

The evidence supports a review of current practice of T+A staying overnight.

"Sell" the evidence.

Selection of patients

Base your redesign work on the data.

Individual data comparison.

Comparative data for outcomes. Physicians difficult as share patients.

Clarity of vision and leadership.

## **Key Ideas (Data session)**

Need more evidence to help correlate ALOS and good health care

Coding and revenue are important but how do we engage the clinical staff and use their time appropriately?

Look into the effect of using HFNP O2 on Regional units ALOS

Criteria led discharge

ALOS by day of the week

## **Key Ideas (PM session Day 1)**

Good communication with tertiary facility

Consistent process communicative coordinate

Tertiary staff knowing the capabilities of the peripheral hospital and staff skill set

Upskilling peripheral hospital staff

Education of coding

Network: Criteria led discharge email centrally – adopt per local processes

## **Review/Recap day 2**

Multi-disciplinary APP

Video capture

Innovative IT options

IT will be used more by the Health Sector

Patient centred care and communication

Orientation videos

Direct patient feedback as routine would be valuable

Freedom of access to internet resource to enable innovation

Email/SMS for elective surgery admissions

Explore Camtasia for staff and family education

Talking boards in hospital – focus on indigenous families

Multi disciplinary teams ward round apps

Clinician Bio's – Personalisation and Connection

## Hot Topics/Key Issues
