

CASEMIX REVIEW MEETING EVALUATION (HRT1302a)

Brisbane 6 March 2013

A Casemix-review meeting consisting of a morning data-tutorial and an afternoon planning workshop was held in Brisbane on 6 March, prior to the costing group meeting. We discussed our recommended approach to engage both senior management and clinicians in six-monthly data comparisons, and reviewed our operational planning approach, using historical activity data at the unit level to help predict future volume and bed day requirements. Feedback from the meeting was very positive with 100% of respondents agreeing that the meeting met their requirements, that the data reports are useful, that the meeting was worth attending, and that the Roundtable staff provided professional support. The one-day workshop format did not allow much time for participants to gain insights from other members, or to learn specific improvement ideas for implementation.
