

# Using HRT data

**Southern DHB  
(Aurora and Hermes)**

**HRT 1515 Improving quality + patient safety /Utilising Health Roundtable data  
22 September  
Auckland**

# Overview

---

- 3 levels of action
  - Mortality data
  - Key Issues
  - Detailed analysis

# Mortality Data

---

- First priority when reports released
  - Any overall mortality key issues goes to Director of Performance for information
  - Specific issues are taken to Directorate Leadership Teams for detailed analysis and action
  - Actions fed back to Executive

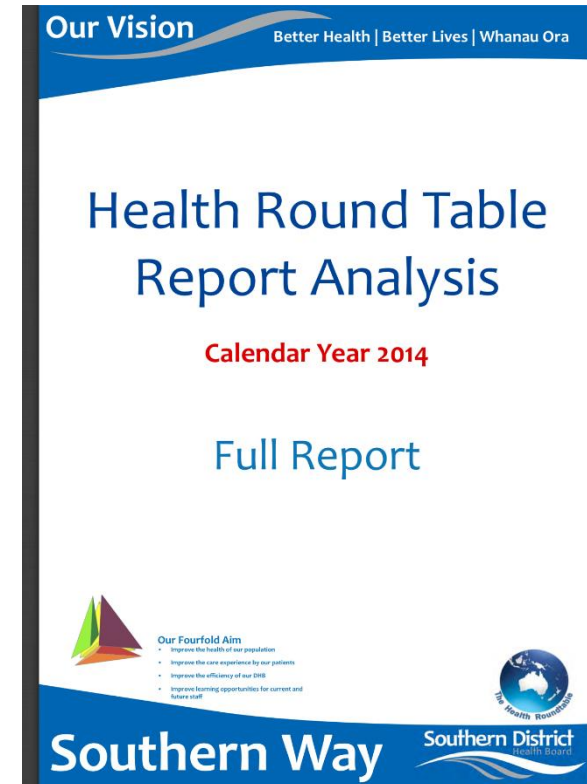

## Key Points (Quarterly)

---

- Each release given a “once over” for significant points
- These are referred to respective Directorate teams for action

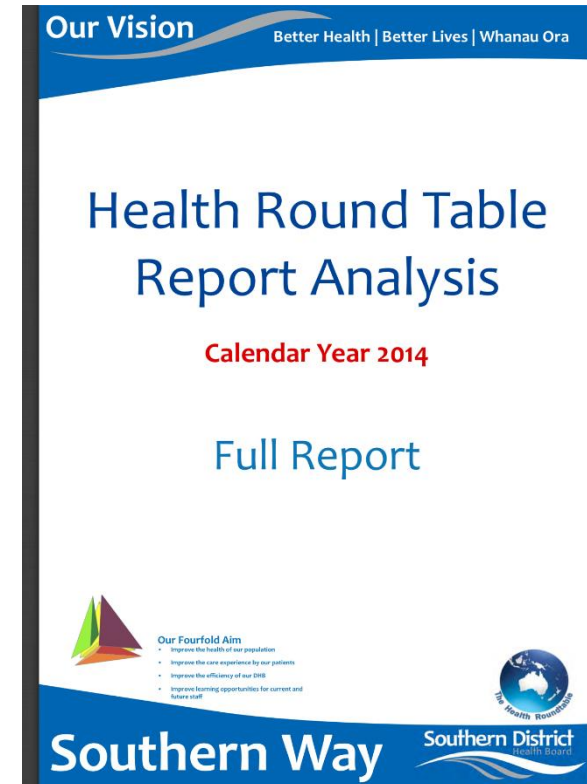

# Annual full analysis

- Was done 6 monthly, but overlap of data caused confusion
- Full analysis of Departmental, KPI and DRG reports
- Focus is on efficiency issues, general quality issues
- Additional safety analysis of CHADx data

# Annual full analysis

- Report circulated widely within clinical teams
- Follow-up meetings with each Directorate to cover key issues
- New reporting structure being set up to ensure task completion on actions

# What happens from full report?

---

- Specific actions feed back through regular management mechanisms
- New reporting system to ensure completion
- Feed into other programmes
  - Patient safety (esp CHADx data)
  - 6,000 Beddays

# What happens from full report?

- Initiates *Skills for Change* projects
  - Readmission rates
  - CHF length of stay
