

Implementation of a Digital Patient Transport System in Radiology Princess Alexandra Hospital (PAH)

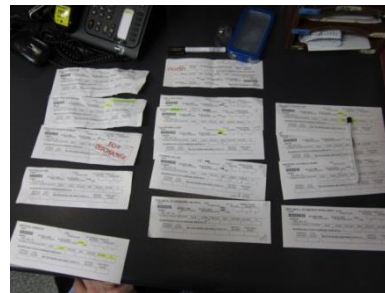

Problem: Old transport system was antiquated, paper based, inefficient and unable to provide data analysis/ statistical information.

Solution:

- Replaced transport cards with communication via mobile devices
- Revised who performed what tasks within the process
- Standardised Task Input/ Local Controller

Results: Improved statistical information:

- Pre – 66 jobs logged per day
- Post – 217 jobs per day
